

# NOTICE TO WATER SYSTEM USERS

## COLIFORM MONITORING VIOLATION

Snoqualmie Pass Utility District water system, ID # 81048F, located in King County is required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring indicate whether your drinking water meets health standards. During December 2020 we did not monitor or test for coliform bacteria or collected fewer samples than we were required to collect. Therefore we cannot be sure of the quality of your drinking water during that time.

At this time:

- No action is required by the users.
- We collected the routine coliform sample required for the month of December 2020 (collected 2 of the 4 required samples) and the lab found no coliform bacteria.
- We will collect samples in the future as required. Will collect 7 samples in Jan 2021.
- Other information for customers: Jan 2021 sample results continue to be negative.

For more information, contact: Snoqualmie Pass Utility District
