

Water Meter Portal and Water Preparedness

Snoqualmie Pass Utility District requires that all properties have a main shut off valve for their water system located inside the dwelling.

- Each dwelling shall have a ¼ turn ball valve for property owners to turn the water off when the dwelling is vacant for extended periods of time, or in an emergency.
- During winter months the home’s water meter is buried under snow and not accessible, thus this main shut off valve located in the home is very important to turning the water off.

*All customers have water meters with radios so that the usage can be monitored remotely by the District and by the homeowner. Water usage responsibility shifts to the customer once the water passes through the meter and enters the customers service line that supplies the dwelling.

How can I be responsible with my own water?

Water Usage Portal:

Snoqualmie Pass Utility District offers customers access to view their own water meter online. The system allows you as the customer to set up usage alerts for abnormal water usage and possible leaks. Please set up a daily alert of 100 cu ft.

Go to the website – www.snopass.org

<https://my-spud.sensus-analytics.com/login.html#/signin>

The screenshot shows a blue navigation bar with four main sections:

- Payment Portal**: Click here to see the new payment portal flyer! (SEE DETAILS button)
- New Water Connection**: Apply for new Water or Sewer Connections? (LEARN HOW TO APPLY button)
- Water Usage Portal**: Water meter portal to view usage. (GO TO PORTAL button, highlighted with a red box)
- Public Documents**: Documents will be posted here before meetings. (GOOGLE DRIVE FOLDER button)

Please take a few moments and set up your water meter usage account. Be sure you enter your **last name** then **first name** (as it appears on your monthly bill) when you first set up your account.
