

Customer Water Meter Portal

Snoqualmie Pass Utility District offers customers access to view their daily water usage online. The system allows you to monitor and be responsible for your own water usage. Daily usage alerts can be set up to notify homeowners of abnormal water usage.

What we see most often is when someone comes to their home on the weekend, flushes the toilet and then leaves. The toilet continues to run and use water. A running toilet can use up to 200 gallons of water an hour; this will make your monthly bill very costly.
